

Accelerate Digital Transformation with Azure DevOps and GitHub

The Challenge

50% of Fortune 500 in 2000 now **replaced** by organizations that **use technology** to deliver customer value **faster, better, and cheaper**

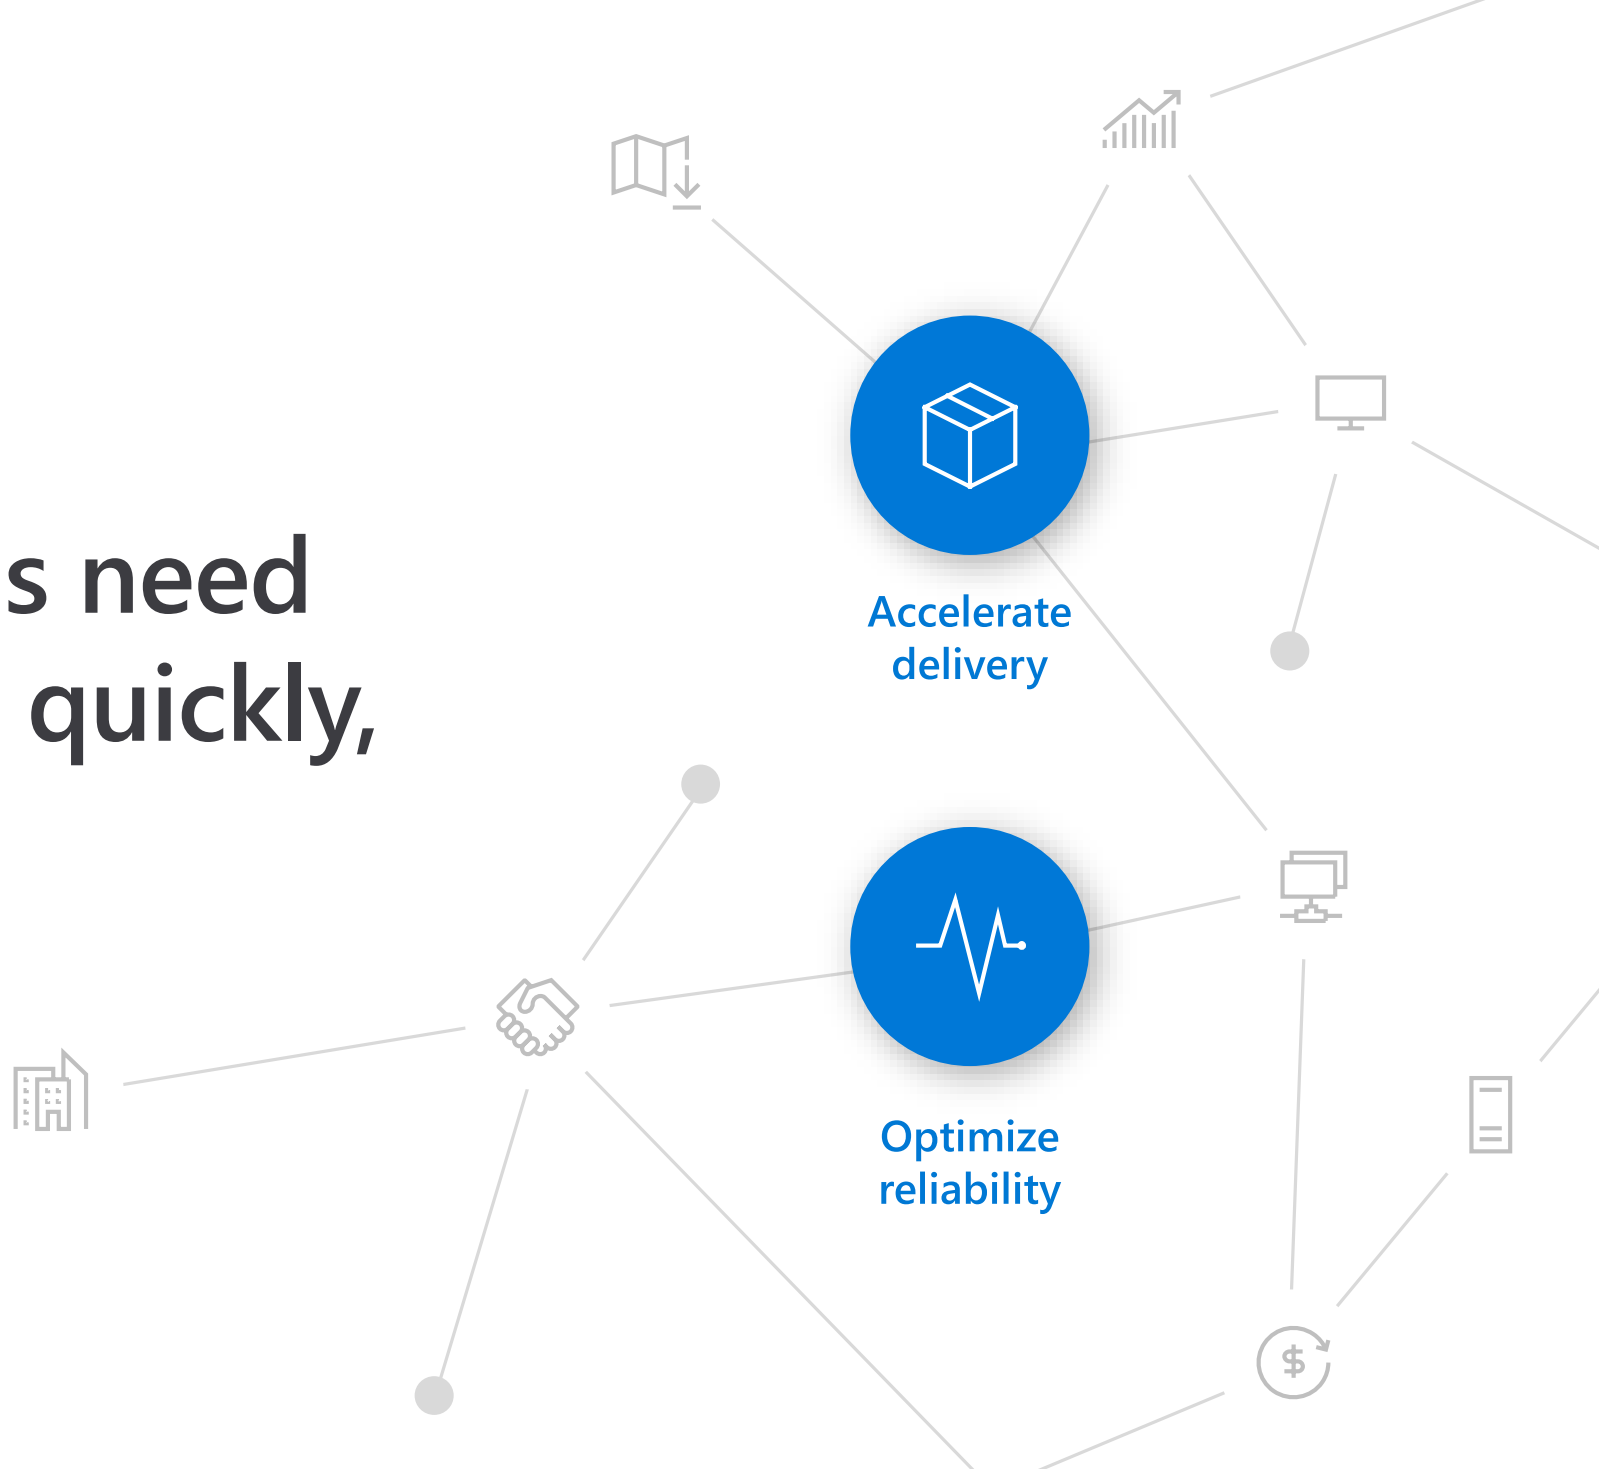

The Fortune 500 of today face the same challenge tomorrow

Innosight

Corporate Longevity: Turbulence Ahead for Large Organizations

**Product innovations need
to reach customers quickly,
and stay available**

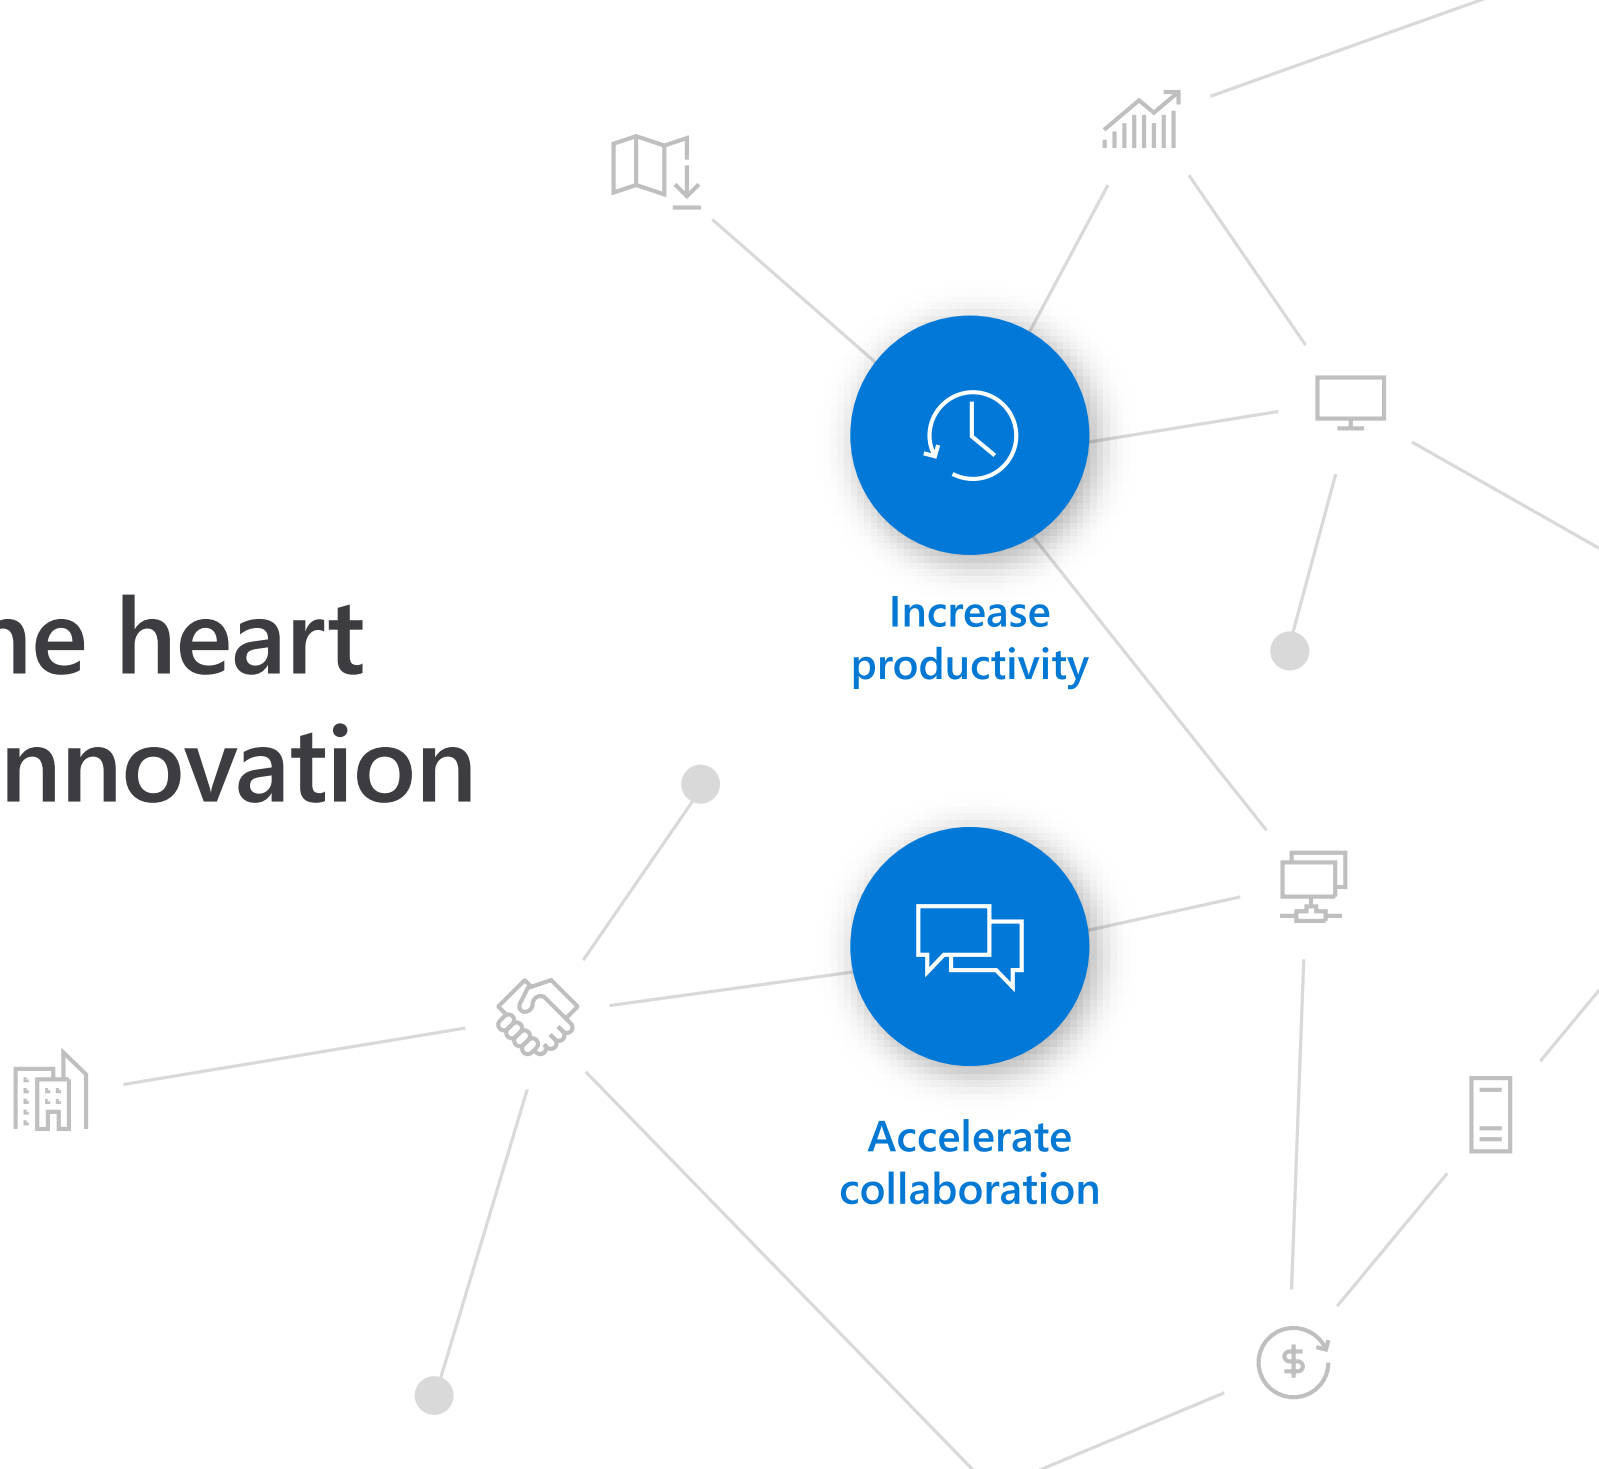

Software delivery paradox

Speed vs. control impedes innovation

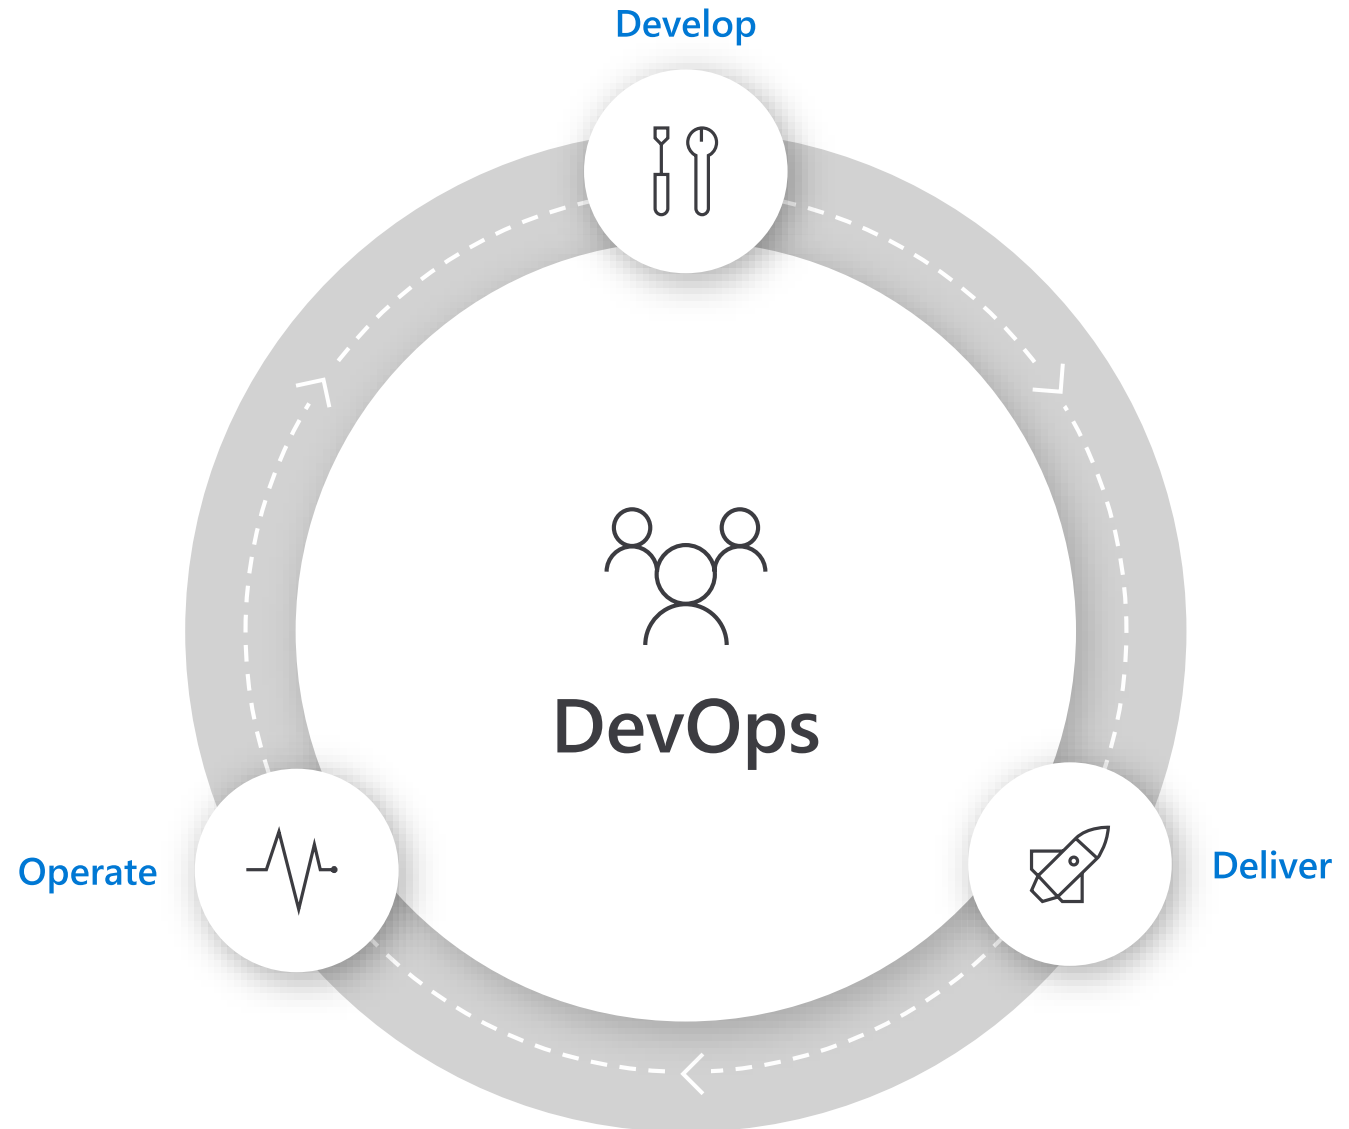

Developers are at the heart of your company's innovation

Accelerating Delivery with DevOps

DevOps is the union of **people**, **process**, and **products** to enable continuous delivery of value to your end users.

Innovation with oversight

Top performing DevOps companies spend more time innovating and less time “keeping the lights on”.

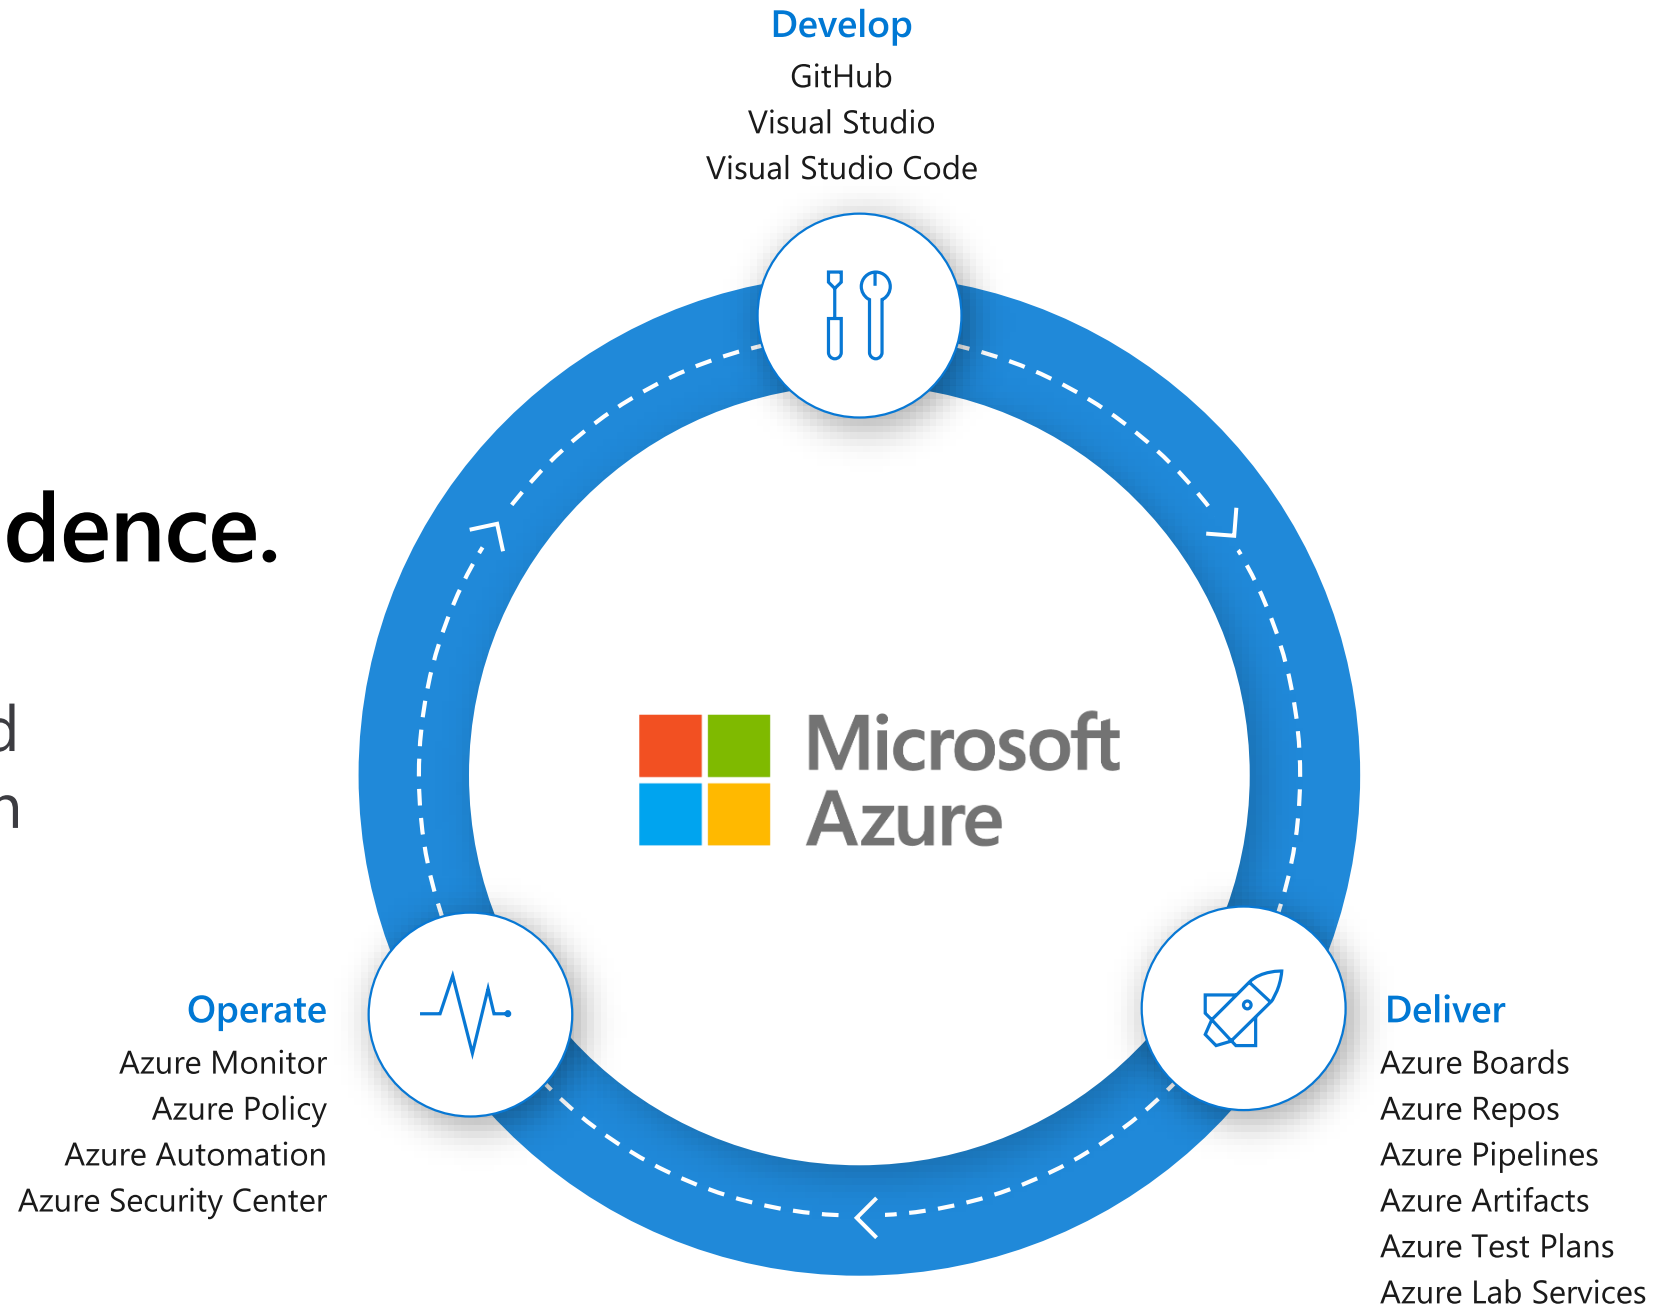

The result: better products, delivered faster, to happier customers by more engaged teams

Our Solution

Innovate at scale. Deliver with confidence.

Microsoft Azure is the cloud
with DevOps tooling built in

Deliver with Azure DevOps

Azure Boards

Azure Repos

Azure Pipelines

Azure Artifacts

Azure Test Plans

Deliver

Azure Boards

Azure Repos

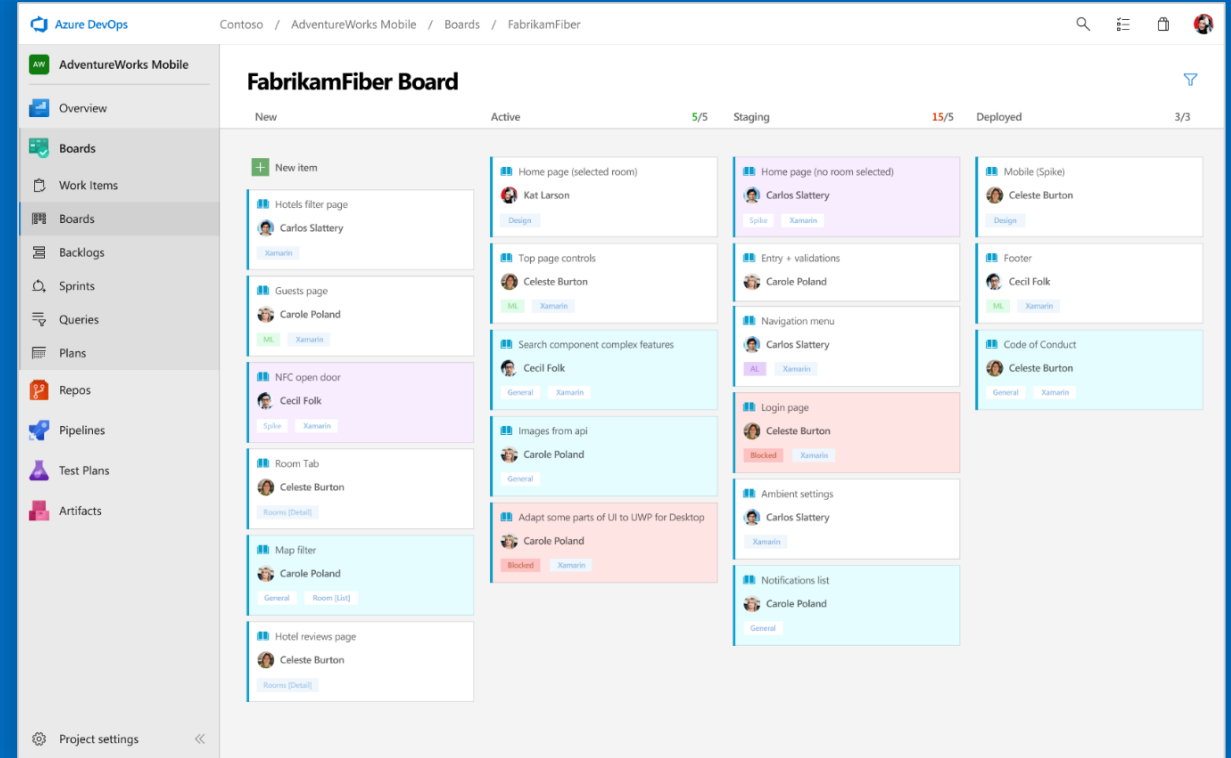

Azure Pipelines

Azure Artifacts

Azure Test Plans

Connecting ideas to releases

Scrum ready to help your teams run sprints, stand-ups, and plan work

Integrated with GitHub commits and pull requests

Insights into project status and health

Deliver

Azure Boards

Azure Repos

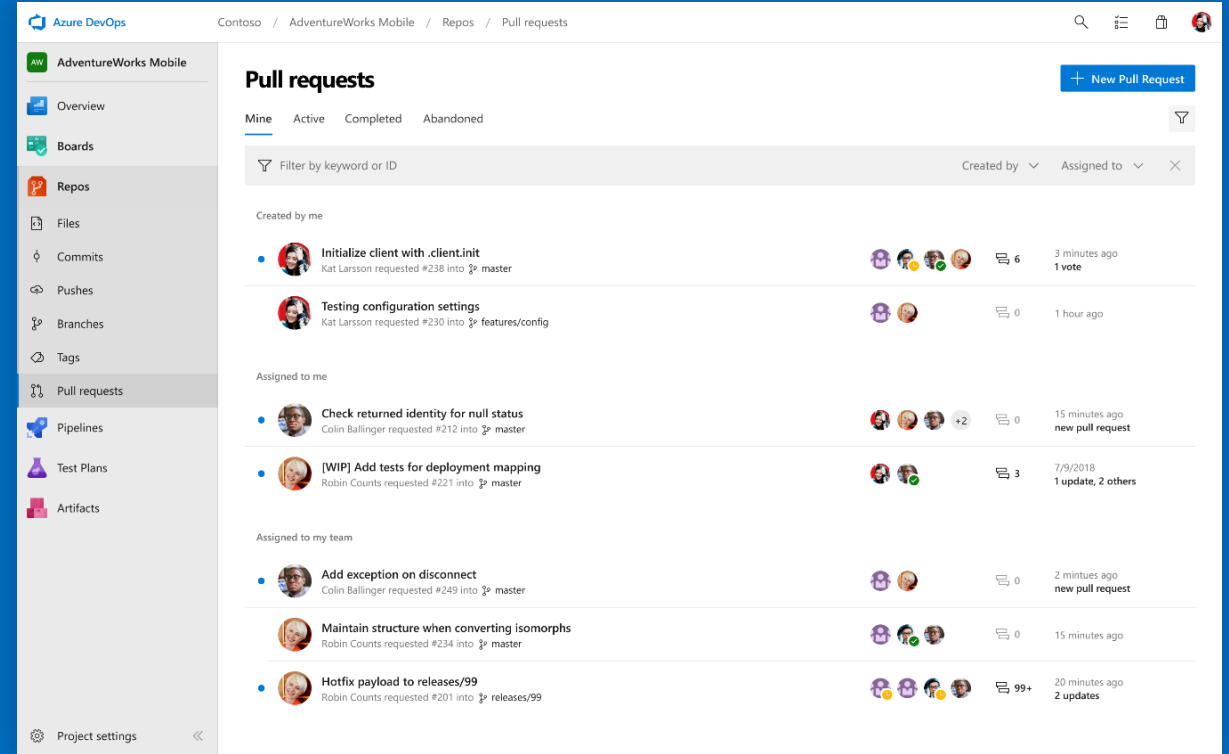

Azure Pipelines

Azure Artifacts

Azure Test Plans

Private Git and TFVC repos for your teams

Code review via branch pull requests

Branch policies and build validation

Easy migration path to / from GitHub

Deliver

Azure Boards

Azure Repos

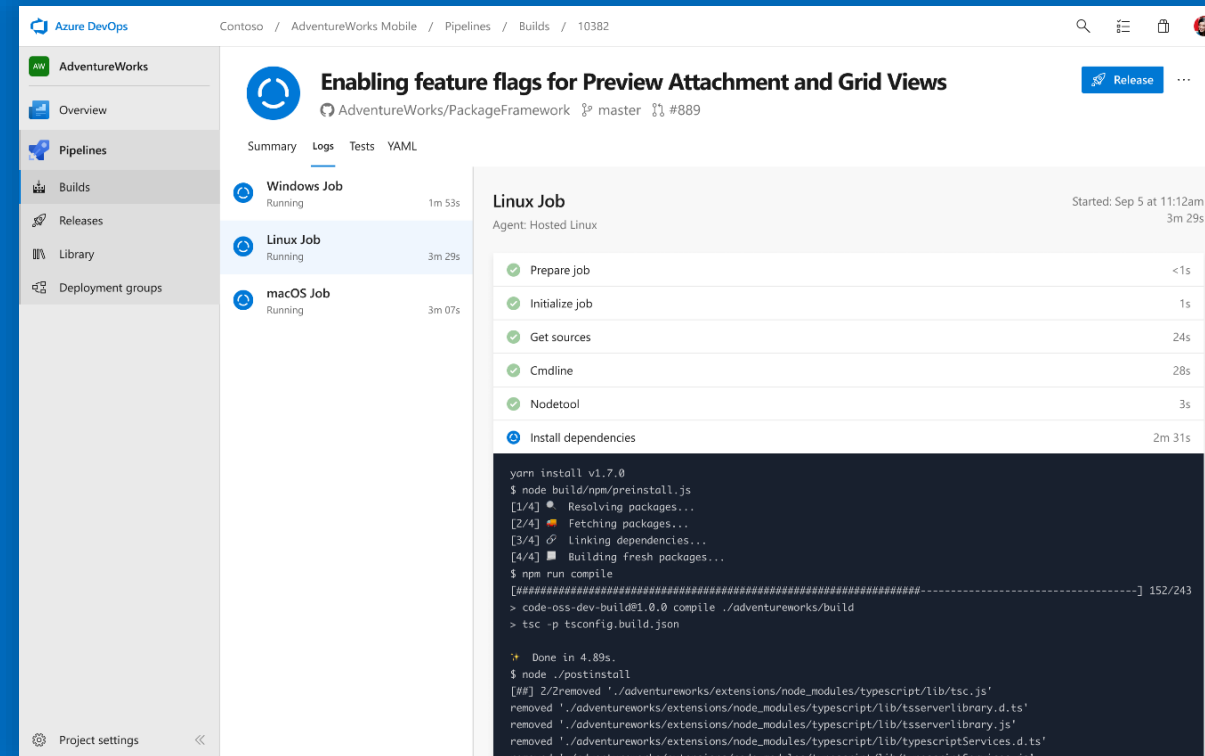

Azure Pipelines

Azure Artifacts

Azure Test Plans

Cloud-hosted pipelines for Linux, macOS and Windows

Any language, any platform, any cloud

Native support for containers and Kubernetes

Best-in-class for open source

Deliver

Azure Boards

Azure Repos

Azure Pipelines

Azure Artifacts

Azure Test Plans

Deploy to on-premises, ANY cloud or a hybrid of cloud and on-prem

Staged environment releases

Pre and post deployment approvals with gates to automate approval based on conditions

Deliver

Azure Boards

Azure Repos

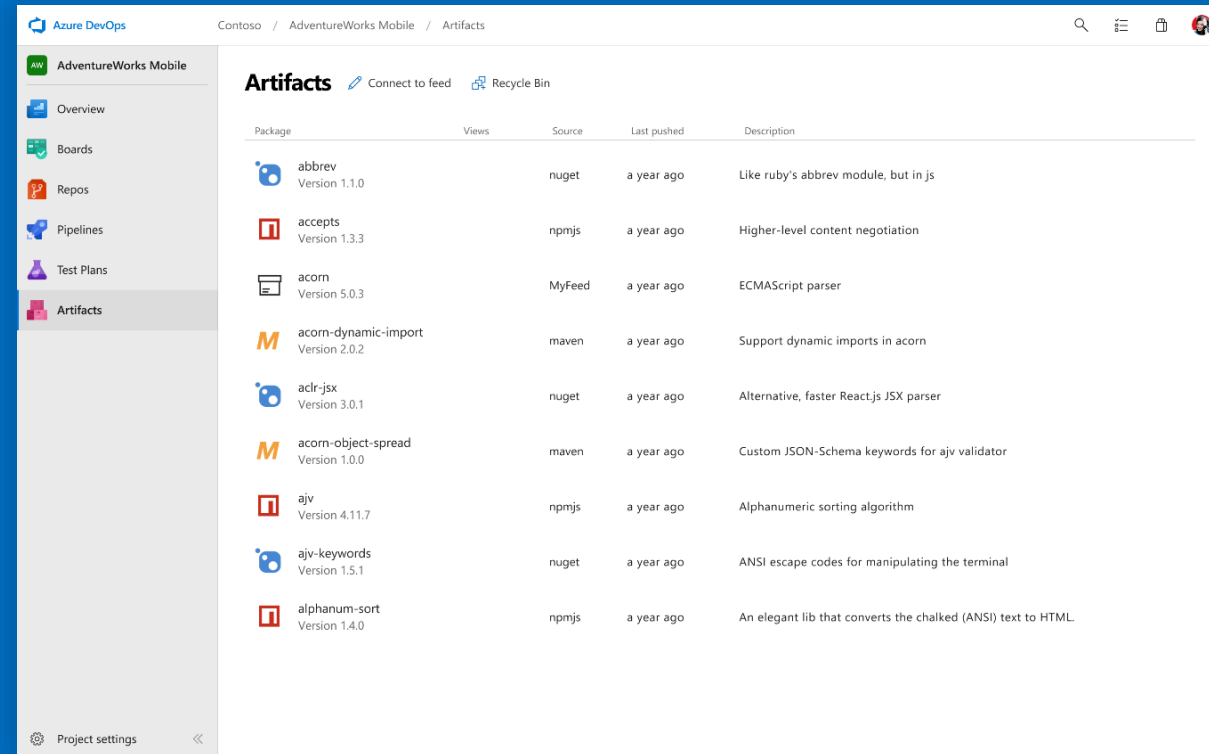

Azure Pipelines

Azure Artifacts

Azure Test Plans

Share code efficiently

Keep your Maven, npm, NuGet and Python packages and more in the same place

Aggregate from public registries and internal teams

Publish and track from any pipeline

Deliver

Azure Boards

Azure Repos

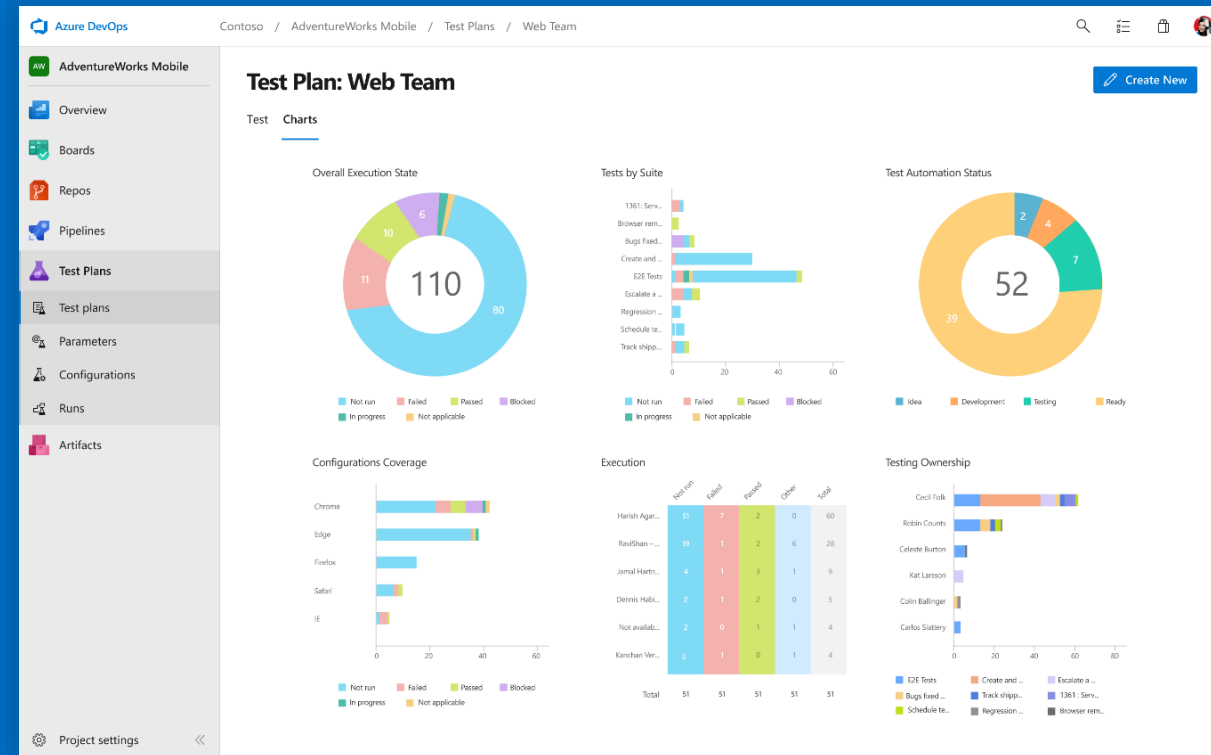

Azure Pipelines

Azure Artifacts

Azure Test Plans

Run tests and log defects from your browser

Track and assess quality throughout your lifecycle

Capture rich data for reproducibility

Create tests directly from exploratory sessions

Deliver with

GitHub

GitHub brings the **premier** social coding workflows to your team, breaking down silos and enabling Inner Source through:

- Expertise sharing
- Cross-team collaboration
- Improved code reuse
- Increased velocity

The #1 developer community on the planet

Most contributions **1.1B in 2018**

Most developers **33M**

Most Repos **100M**

Most secure **5M vulnerability alerts in 2018**

Home to the most
important and popular
open source projects
on the planet

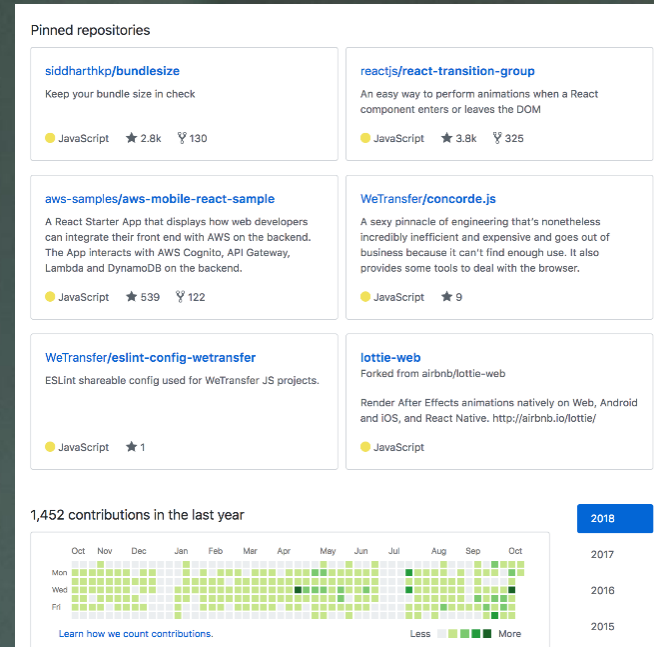

Winning the war for talent

The world's leading companies use and contribute to open source software. It is also how they attract and retain talent

Developers want to:

- Solve interesting problems
- Collaborate with other developers
- Grow their skills
- Use tools they love

Azure DevOps Integrated with GitHub

Rich integration with Azure Pipelines
and Azure Boards

Azure Pipelines

Free **unlimited** build minutes for public projects

Up to 10 free parallel jobs across Windows, Linux and macOS

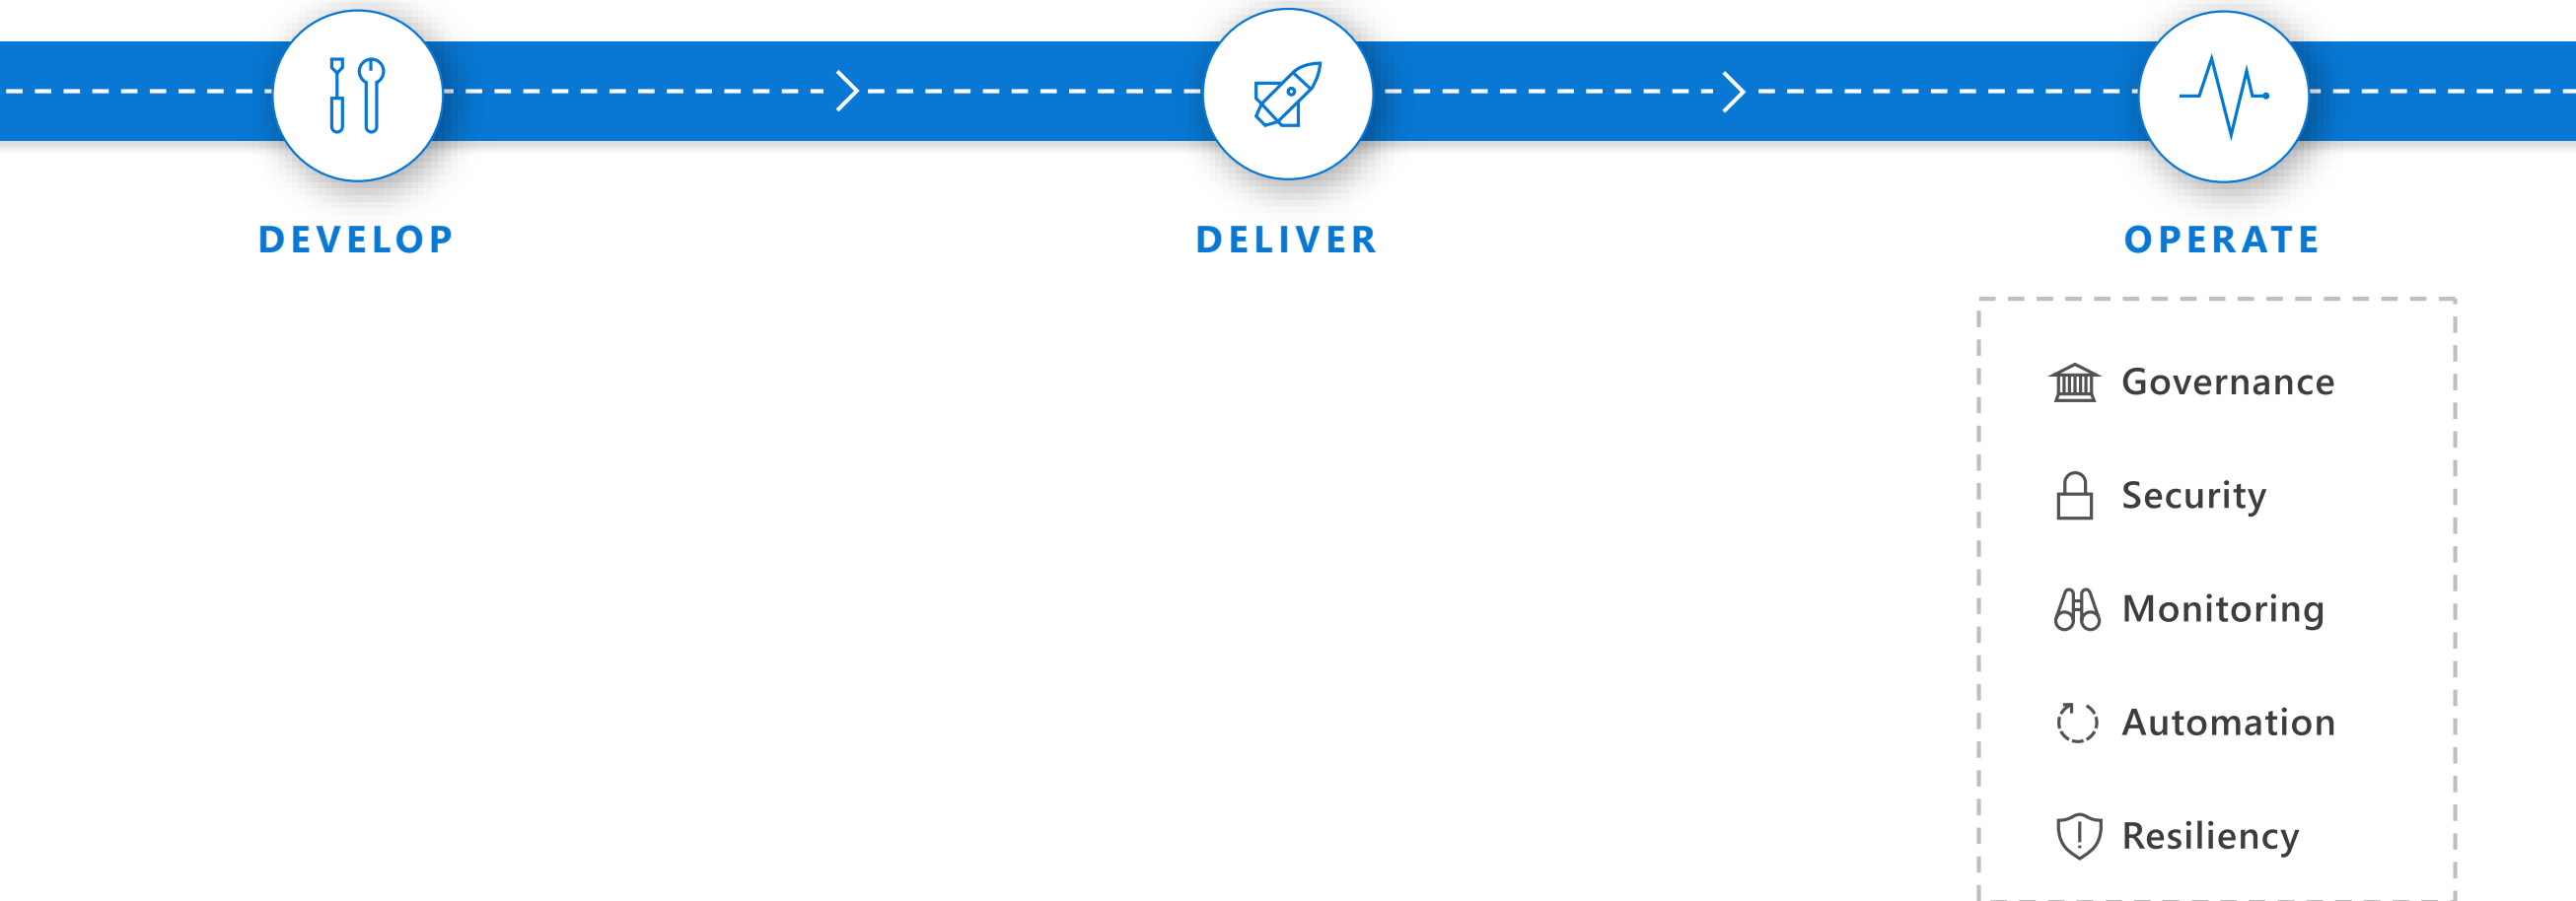

<https://azure.com/pipelines>

Microsoft ❤️ Open Source

Demo:

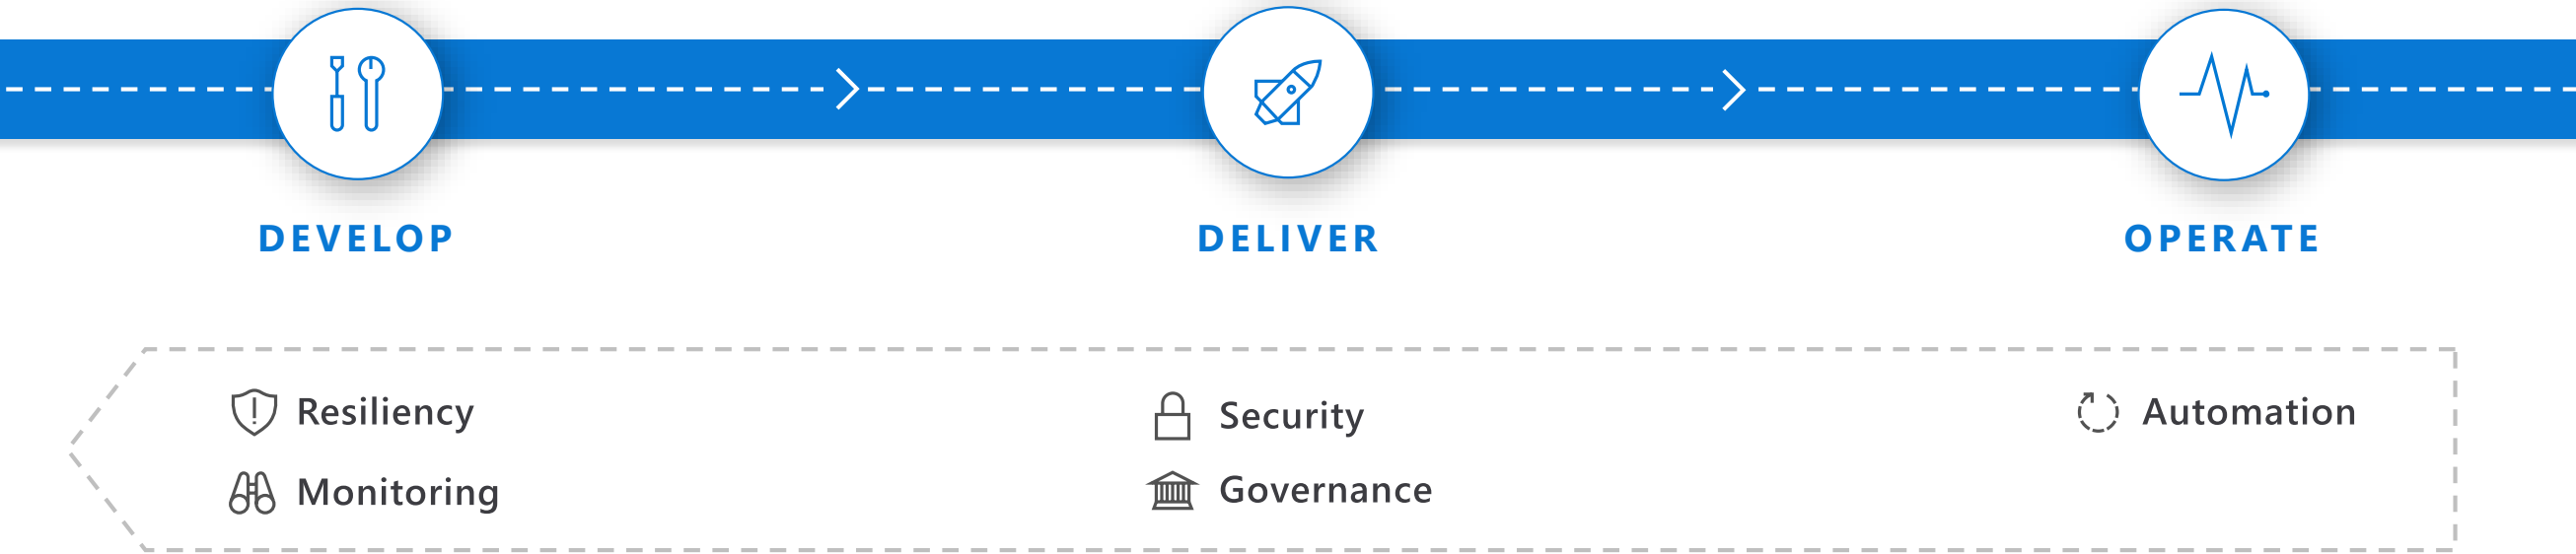

Azure DevOps with GitHub

Reactive operations

Moving to proactive operations with Azure

"Shifting left"

Deploy continuously and compliantly

Enterprise-grade security, monitoring, and management services built-in

Governance

Proactively apply policies and enable compliant releases

Azure
Policy & Blueprints

Security

Industry leading Security with Advanced Threat Protection

Azure
Security Center

Resiliency

High availability and protection for VMs, apps and data

Azure
Backup & Site Recovery

Monitoring

Deep operational insights with rich intelligence

Azure
Monitor

Automate

Powerful scripting, configuration and update management

Azure
Automation

Use the tools you know and love

Azure and GitHub are fully integrated with your existing tools and workflow

Core Infrastructure

Compute
Security
Storage
Management
Networking

Advanced Workloads

Web + Mobile
Internet of Things
Microservices
Containers
Serverless
Identity
Data + Analytics
Artificial Intelligence
Cognitive Services
High Performance Computing

Azure Stack + Hybrid

The cloud with DevOps tools built in

Azure DevOps

- Continued heavy investment in Azure DevOps
- Best in class CI/CD solution across the industry
- Best & most loved solution for managing development teams
- Tight integrations with GitHub
- Provide enterprise scalable package management

<https://azure.com/devops>

Azure DevOps supports small teams and the largest enterprises

“ Instead of telling people to wait for 6 months for a new feature, we can give it to them in a few weeks...Our 2800 worldwide developers can use the same backlog, user stories and tests whether they're on Windows or Linux... building for iOS or Android. ”

“ Microsoft made it really easy to break outside the silos... and tie the DevOps process into the fulfilment of business process. Without the tools that we have today, we would not be successful. ”

“ Speed is gained in moving to the PaaS offering of Azure DevOps. PaaS provides regularly released features and a future-proof capability, eliminating the need for Accenture to maintain infrastructure and go through upgrade cycles. ”

“ Branches sync 500 percent faster. Builds are 400 percent faster, with the typically six-hour process reduced to 90 minutes. We (now have) a highly streamlined process that operates with a few button clicks—and one-button deployment. ”

DevOps at Microsoft

Azure DevOps is the toolchain of choice for Microsoft engineering with over 100,000 internal users

Global Reach

Azure DevOps has more global regions than any other cloud provider

Migrating from On-Prem to the Cloud

Move from Team Foundation Server to Azure DevOps and bring your data along

Benefits of Cloud Hosted Azure DevOps Services

- Global availability
- Hosted and maintained by Microsoft with 99.9% uptime guarantee and 24x7 support
- Immediate access to latest features
- Simplified deployment to Azure

Azure DevOps Import Service

- Fully supported high fidelity migration path
- Trusted by many large enterprises
- Now faster and easier to use
